

NOTICE INVITING WRITTEN PUBLIC COMMENT

NOTICE is hereby given that the Air Pollution Control Officer of the Bay Area Air Quality Management District has made a preliminary decision to issue an initial Synthetic Minor Operating Permit to Stanford University, located at 480 Oak Road, Palo Alto, CA, as requested under application #26344.

The proposed permit will impose federally enforceable permit conditions that limit the facility's potential to emit nitrogen oxides (NO_x) and carbon monoxide (CO) below the major source threshold of 100 tons per year for each pollutant. By limiting the facility's potential to emit, the proposed permit exempts the facility from the requirements of Federal Operating Permit Program as codified in Title V of the 1990 Clean Air Act Amendments.

The Air Pollution Control Officer invites written comment on the proposed initial Synthetic Minor Operating Permit for the facility listed above. Comments must be received by June 5, 2018.

The permit evaluation report can be viewed on the District website at <http://www.baaqmd.gov/permits/public-notice>. It will also be available for public inspection at the District Headquarters, 375 Beale Street, Suite 600, San Francisco, CA 94105. Written comments should be mailed to Dharam Singh at the BAAQMD, 375 Beale Street, Suite 600, San Francisco CA 94105 or by e-mail to dsingh@baaqmd.gov.

Dated at San Francisco, the 23rd day of April 2018.

Jack P. Broadbent
Executive Officer/Air Pollution Control Officer
Bay Area Air Quality Management District
